+86 13693554167 | Beijing, China | joey.xf@gmail.com | github.com/xcaptain | 154839.xyz

AI Application / Agent Engineer with 12 years of software development experience: building agent products and AI SaaS since 2024; previously Web3 public chains and NFT trading platforms.

Work Experience

Independent Developer (Full-stack / AI) Jan 2024 — Present
Freelance *Remote*

- Core engineer at realstack: property management and data analysis system with Next.js and AI.
- Full-stack engineer at intuipay: Web3 donation platform with Next.js, Cloudflare Workers, and blockchains.

Backend Engineer Mar 2023 — Dec 2023
Alienswap (alienswap.xyz) *Remote*

- Built an NFT indexing system with Reservoir supporting exchange contracts; contributed upstream feedback.
- Designed and implemented a centralized NFT exchange; supported a movie NFT project's minting and launch.

Blockchain Engineer Aug 2021 — Nov 2022
DeeperNetwork (deeper.network) *Remote*

- Maintained Deeper Chain (Substrate/Rust) and mining programs (Node.js); extended Polkascan (Python).

Backend Engineer Apr 2020 — Aug 2021
Shimo (shimo.im) *Beijing, China*

- Delivered Shimo Docs backend features in Go/Node.js; built performance and ops tooling for private deployments.

Backend Engineer → Co-Founder Jul 2014 — Mar 2020
7k7k Games · Guazi · Wanqu Technology *Beijing / China*

- Jul 2014 – May 2016, Backend Engineer (7k7k): developed game backend services in PHP.
- May 2016 – Mar 2018, Backend Engineer (Guazi): developed used-car business systems in PHP.
- Mar 2018 – Mar 2020, Co-Founder (Wanqu): co-founded an HTML5 mini-games startup with two partners.

Selected Projects

Taskpost — browser-based general agent (taskpost.org) Sep 2026 — Present

- Browser-based agent on Cloudflare Workers + Containers: file read/write, commands, web search, read-only sharing.

phi — minimal coding agent based on pi architecture (github.com/xcaptain/phi) Jul 2026 — Present

- C# coding agent: agent loop, replaceable providers, context compaction, session persistence, desktop + TUI, plugin hot-reload; unit-tested.

SparkPin — web comment and annotation SaaS (sparkpin.xyz) Mar 2026 — Present

- Two-line embed for any site; SvelteKit + Cloudflare Workers + multi-tenant auth; CSS-based highlight locator.

MyPod Space — web-to-podcast browser extension Jan 2025

- Local Kokoro TTS via ONNX; turns web pages into podcast RSS; published on Chrome and Edge stores.

Open Source: casbin-rs, Community Mentor & Core Contributor, 2019 – 2021; core Rust authorization and PR review.

Skills

- **Languages**: TypeScript/JavaScript, Go, Rust, Python, C#, PHP, Solidity
- **AI / LLM**: agent architecture (loop, tool calling, context compaction), LLM APIs, ONNX inference
- **Web / Full-stack**: Next.js, SvelteKit, Tailwind, Node.js, Cloudflare Workers, Drizzle, better-auth
- **Blockchain**: Substrate, EVM, NFT indexing, smart contracts, trading platforms
- **Tools**: Git, Linux/Unix, CI/CD

Education: Nanchang University — B.S. in Information and Computing Science Sep 2010 – Jul 2014
